## Multimedia Messaging *Command Comparison Card*

Welcome to CallPilot. This card helps you to learn CallPilot by showing you the key differences between CallPilot and your previous messaging system. For example, CallPilot provides many universal commands that you can use at any time, so you don't need a main menu. Also, when you log in, you are at your first *new* message, and then you can move back and forth in your message list to play any new or old messages. Prompts guide you whenever you pause, and Help is always there when you need it, just press \* at any time. For further information, refer to the CallPilot Multimedia Messaging User Guide.
